

Large & Small Cleanup Bin

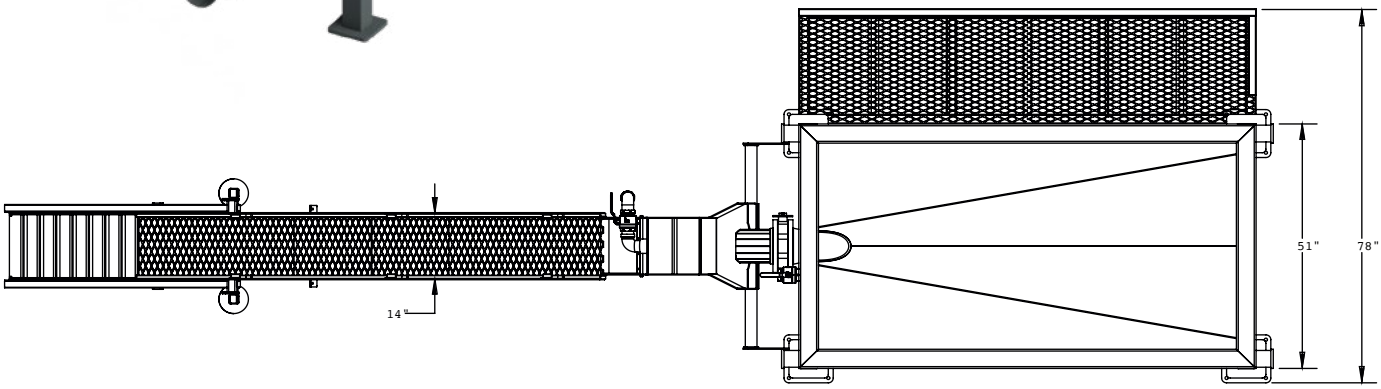

The Macon Industries Large and Small Cleanup Bins are built for efficient concentrate management on wash plants. Equipped with a siphoning hose for seamless water drainage and a butterfly valve for precise material flow control, these bins streamline the cleanup process. Their self-aligning legs ensure quick setup and stability, making them ideal for feeding directly into the hopper of Macon's T-150 Cleanup Plant.

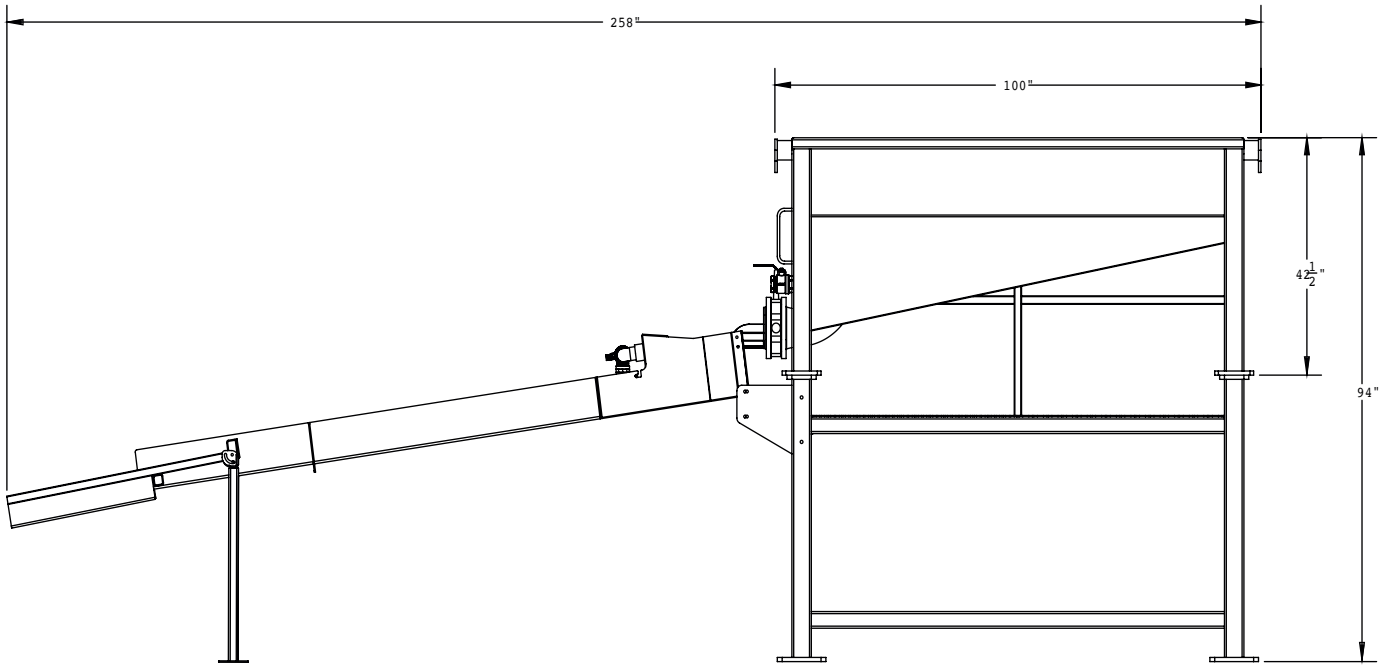

Designed for durability and ease of use, they're essential tools for maximizing gold recovery with minimal effort.

LARGE CLEANUP BIN

- 6” down - 1305 litres
- Full - 1589 litres

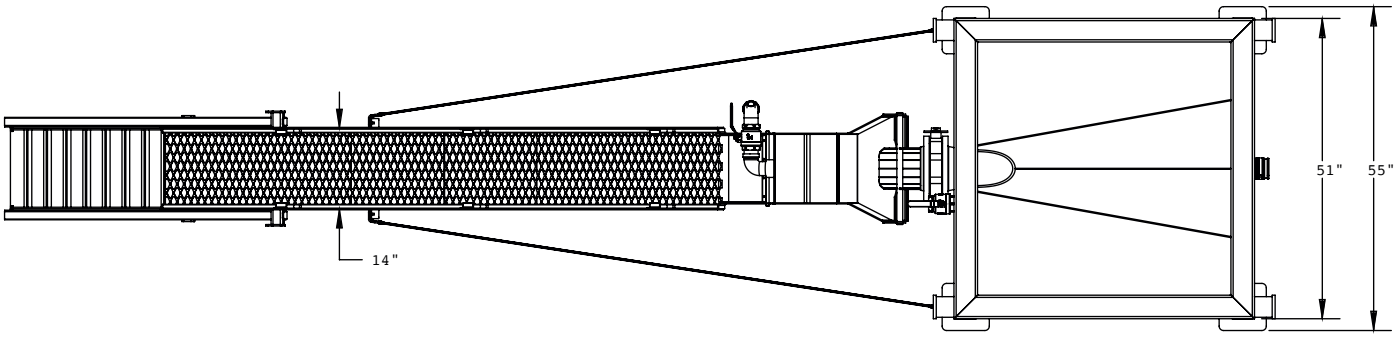

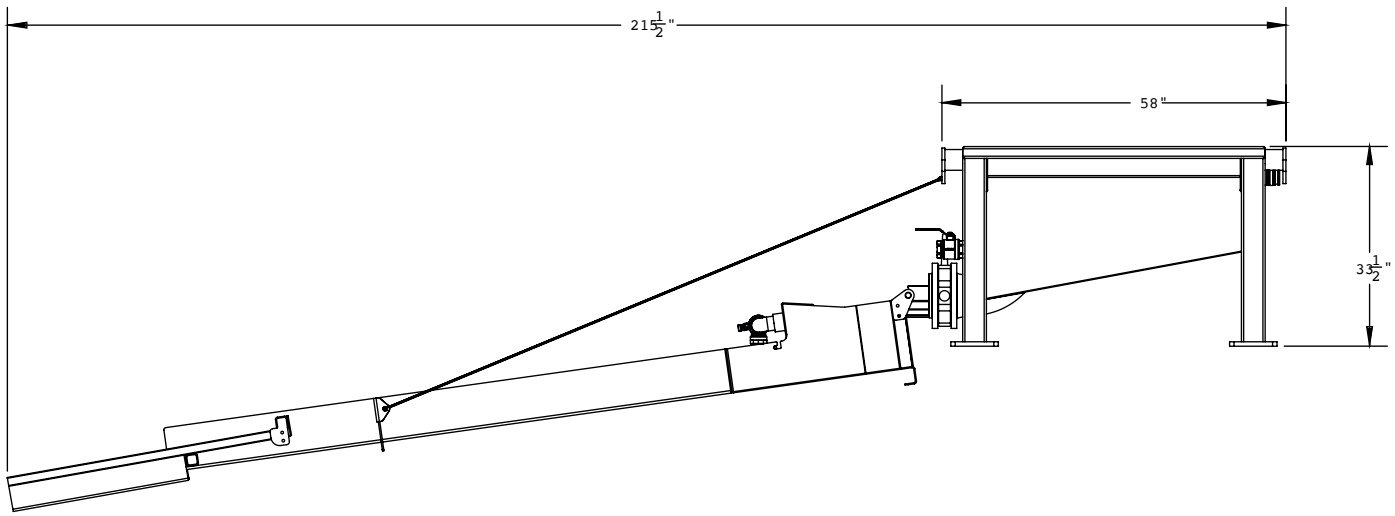

SMALL CLEANUP BIN

- 6” down - 798 litres
- Full - 1217 litres
