

SD-100

The SD-100 Vibrating Screen complements Macon's lineup of gold concentrate cleanup equipment. The screen produces classified feed for efficient shaking table or gold wheel operation.

Typical Applications:

- Wet-screening of T-150 or Longtom concentrate prior to Tabling

SPECIFICATIONS

CONCENTRATES PER BATCH	TONS PER HOUR	20-50 LBS
VIBRATING MOTOR	HP	0.3
VIBRATING MOTOR	POWER	110-230V / 1-PHASE
WATER REQUIREMENT	WASH WATER	10 GPM

Capable of processing larger quantities

FEATURES & OPTIONS

- Double Screen Deck with quick-exchange wire mesh screen cartridges
- Wide range of available screen aperture sizes 10Mesh, 20Mesh, 30Mesh, 50 Mesh
- Hopper design for scoop feeding or flush feeding directly from 5 gallon buckets
- 2x oversize and 1 x undersize collection in standard 5 gallon buckets
- Built-in undersize collection pan with overflow weir allows spillage-free closed water recirculation in conjunction with Macon Gemini GT250 tabling system
